Introducing CSSBattle—The First CSS Code-Golfing Game

CSSBattle is the first ever code-golfing platform for CSS lovers. The aim of this game is simple—you have an image target which you need to replicate with the smallest possible CSS (and slight HTML if you please) code. More visual match and fewer bytes get you a higher score. And that is how you climb the leaderboards in CSSBattle.

Created By

CSSBattle is made by 2 CSS freaks:
